November 6, 2011

SESSION SERIES PLAN I

- Introduction to L^AT_EX
- Why use it (or whats wrong with MS-Word)
- Terminology
- Getting started
 - ▷ Installing the software
 - Setting up the preferences
- Document structure
 - ▷ Setting the document class
 - Sections, subsections and formatting
 - Figures and Tables

SESSION SERIES PLAN II

- ▶ Using packages (or whats with this undefined control sequence!)
- ▷ Typesetting Math/Equations
- Bibliographies (and how not to have headaches working with them)
- Advanced topics
- Setting up algorithms
- Code/program/policies/output formatting
- Must-see documents

Introduction to LATEX

- ⊙ Based on T_EX
- \circ Pronounced leh-tek (k being the sound of Arabic $\dot{\tau}$ or Greek χ)
- Takes in IATEX source and generates a number of outputs (dvi, html, rtf, pdf, ps)
- The output is concerned with placing boxes around the page
- Boxes are combined to form other boxes
- Placed using fixed or elastic widths and distances

INTRODUCTION (CONTD.)

- What's wrong with MS-Word?
- Lack of control
- Have to focus on content and presentation at the same time
- Too much effort required to format for specific conferences/journals
- Too much effort to change from one format to another
- Difficult to manage versions
- Difficult to manage references (even with EndNote)

INTRODUCTION (CONTD.)

- Whats wrong with LaTeX?
- ⊙ You need to learn how to use it!
- Its not completely intuitive (for some)

THE POWER OF LATEX – AN EXAMPLE

Output:

what is the second question I should ask you?

THE POWER OF LATEX – AN EXAMPLE

Output:

What is the second question I should ask you?
[3]

Input:

What is the second question I should ask you? $\protect\prote$

TERMINOLOGY

- Document (the output)
- Document Class (the main type defining the doc)
- Package (a file encapsulating commands for a specific purpose)
- .sty (style files)
- ⊙ .cls (document class files)
- FNDB (filename database)
- update (file/repository/meta information)

MUST SEE DOCUMENTS

- ⊙ "A Not So Short Introduction to LaTeX"
- ⊙ "The LaTeX Comprehensive Symbol List"

GETTING STARTED

- To work with LaTeX, you need:
 - ▷ an editor (TEXnicCenter, Kile, WinEdt, LED)
 - ▷ a compiler (MikT_EX, T_EXLive, tetex ...)
- Enough talk. Lets get started!

⊙ Installing software

- ⊙ Installing software
- ⊙ Creating your first document

- Installing software
- Creating your first document
- Getting the required packages

- Installing software
- Creating your first document
- Getting the required packages
- Creating your second document (an ACM format paper)

- Installing software
- Creating your first document
- Getting the required packages
- Creating your second document (an ACM format paper)
- Creating your third document (a Springer format paper)

- Installing software
- Creating your first document
- Getting the required packages
- Creating your second document (an ACM format paper)
- Creating your third document (a Springer format paper)
- Creating your fourth document (an IEEE transactions format paper)

- Installing software
- Creating your first document
- Getting the required packages
- Creating your second document (an ACM format paper)
- Creating your third document (a Springer format paper)
- Creating your fourth document (an IEEE transactions format paper)
- Algorithms

- Installing software
- Creating your first document
- Getting the required packages
- Creating your second document (an ACM format paper)
- Creating your third document (a Springer format paper)
- Creating your fourth document (an IEEE transactions format paper)
- Algorithms
- Mathematical typesetting

- Installing software
- Creating your first document
- Getting the required packages
- Creating your second document (an ACM format paper)
- Creating your third document (a Springer format paper)
- Creating your fourth document (an IEEE transactions format paper)
- Algorithms
- Mathematical typesetting
- Cool output boxes with line numbers!

GETTING THE SOURCES

- You can get the resources for these sessions here: http: //www.csrdu.org/nauman/2011/10/16/latex-screencasts/
- Feel free to leave comments on the post there if you have any questions at all. I'll try to answer them as soon as possible.
- All the required files (and completed documents) can be downloaded from this page.
- You can find a really good resource on learning LATEX here: http://ctan.org/tex-archive/info/lshort/english/lshort.pdf
